OCCUPATIONAL EXPOSURE REQUISITION – SOURCE PATIENT

Source Patient Testing Instructions

- **Do not place a CareConnect order.** The attached form should be printed and sent with the lab specimen. This ensures proper handling of the results and charges.
- **Verbal consent should be obtained whenever possible**, but the Source may be tested without consent according to the procedures outlined in policy HS1348.
- **Draw source patient labs STAT and send them to the lab immediately**, along with the attached form.
- **Specimens that reach the Brentwood Annex lab by 9:30 PM Monday - Friday or by 2 PM on Saturday/Sunday and Holidays will be given priority.** The physician treating the exposed patient (in the ED or Occupational Health) can call the lab (310-794-2745) with the source patient's name and date of birth for an estimate of when results will be available.
- **HIV 1/2 4th Generation with Reflex results will be called to the ordering physician**, according to the phone/pager listed on the order form. It is the responsibility of the ordering physician to notify the ED or OHF physician treating the employee, of the results. If the source patient provided verbal consent to testing, he/she should also be notified of the results.
- **Lab results will appear in the source patient's CareConnect chart after patient notification.**

Employee information

Employees should scrub their wound, inform their supervisor, and **proceed immediately to Occupational Health** (if in Westwood during business hours) **or the nearest Emergency Department** (otherwise) for consideration of post-exposure prophylaxis. Occupational Health can provide immediate treatment to employees who arrive Monday-Friday 7 AM- 4 PM, excluding holidays. No appointment is necessary.

All employees initially treated in the ED must follow up in Occupational Health on the next business day.
